Minerva Supports Udayan Care

In the Summer Minerva celebrated its 30th anniversary. An integral part of these celebrations was to step up Minerva's support for the communities in which it is active, principally India, East Africa, and Jersey.

In India, the work of Udayan Care came to our attention through a number of our clients and professional contacts. Udayan Care is a registered charity created in memory of Udayan Modi whose dream was to help disadvantaged children.

Over the last 15 years, this charity has transformed the lives of many disadvantaged children either by providing long term residential care for the orphaned and abandoned, or through its education, training and advocacy programs.

Following a recent donation, Udayan Care has acquired a beautiful piece of land in Dehradun, the capital of Uttarakhand. It is the charity's intention to create a safe haven for more disadvantaged children by building a Children's Home on this land. Inevitably however, funds are urgently needed to see the building project through to a successful conclusion.

Minerva is delighted to be able to support such a good cause, and has made a significant donation to enable the building project to get off the ground. We will be following the progress of the Dehradun project with great interest, and look forward to the day the first children can benefit from the caring environment it will provide.

Further information regarding the work of Udayan Care can be gained by visiting www.udayancare.org and we would encourage our clients and friends to consider supporting this very worthy cause.
